

# Take Control of Your Projects with MCspm

A unified platform for planning, execution, and tracking

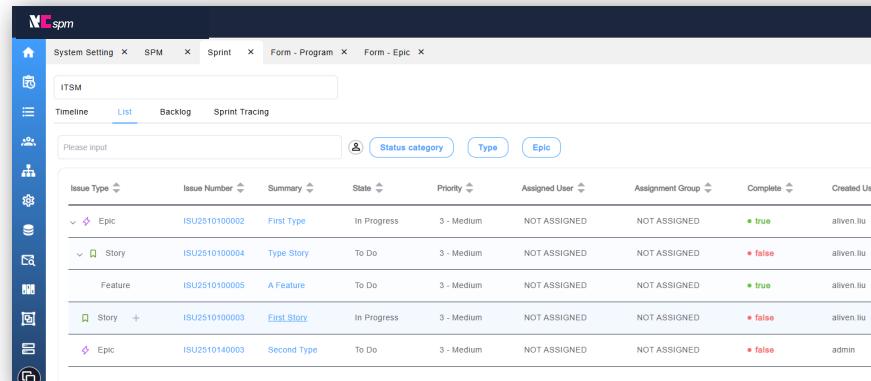

Do you find it challenging to manage multiple projects, track progress, and maintain efficiency across teams? Our project management solution, **MCspm**, is designed to streamline workflows and centralize collaboration. It enables teams to plan, execute, and monitor projects effortlessly. Whether managing daily operations or complex projects, MCspm helps you stay organized and deliver results with confidence.

-  Help software teams **plan, track, and coordinate work efficiently**, from individual projects to complete agile portfolios
-  Deliver advanced planning and tracking
-  Engineer with a strong emphasis on **intuitive workflows** and seamless user adoption
-  Enable teams to become productive from day one, with a **minimal learning curve** and fast onboarding

## Centralized Work & Issue Management

- Track, prioritize, and resolve all tickets, bugs, and user stories **in one place**
- Visualize **task relationships and dependencies** across list, board, and timeline views

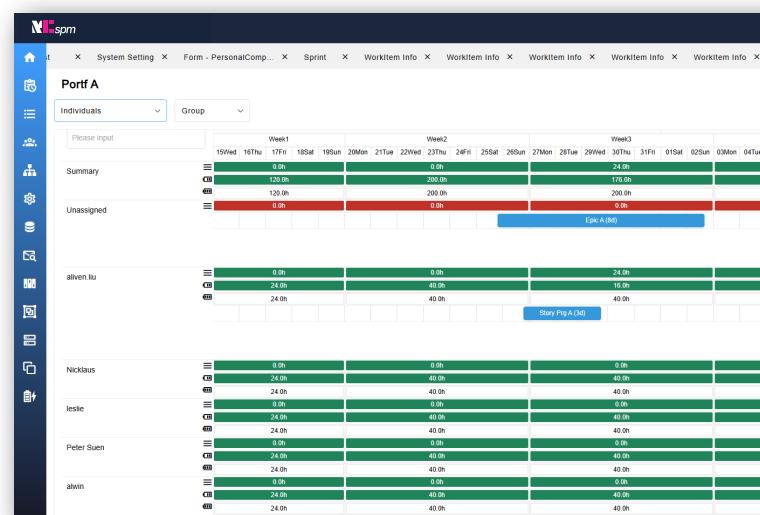

| Issue Type | Issue Number  | Summary     | State       | Priority   | Assigned User | Assignment Group | Complete | Created User |
|------------|---------------|-------------|-------------|------------|---------------|------------------|----------|--------------|
| Epic       | ISU2510100002 | First Type  | In Progress | 3 - Medium | NOT ASSIGNED  | NOT ASSIGNED     | • true   | aliven.liu   |
| Story      | ISU2510100004 | Type Story  | To Do       | 3 - Medium | NOT ASSIGNED  | NOT ASSIGNED     | • false  | aliven.liu   |
| Feature    | ISU2510100005 | A Feature   | To Do       | 3 - Medium | NOT ASSIGNED  | NOT ASSIGNED     | • true   | aliven.liu   |
| Story      | ISU2510100003 | First Story | In Progress | 3 - Medium | NOT ASSIGNED  | NOT ASSIGNED     | • false  | aliven.liu   |
| Epic       | ISU2510140003 | Second Type | To Do       | 3 - Medium | NOT ASSIGNED  | NOT ASSIGNED     | • false  | admin        |

## Optimized Resource Planning & Utilization

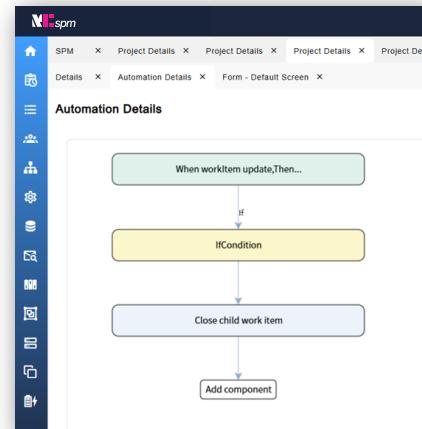

- Align team capacity with project demands to **maximize billable work** and avoid overload.
- Forecast **bottlenecks and identify resource gaps** early to mitigate project risks.
- Direct your most valuable talent toward high-priority, high-impact work.

## Automated Workflows & Process Control

- **Eliminate manual administrative tasks** like assignments, status updates, and notifications
- Enforce standards and prevent issues with **automated alerts for deadlines**, stale items, or priority bugs
- Accelerate delivery by letting teams **focus on execution**, not process overhead

## Seamless Cross-Team Visibility & Collaboration

- Break down silos with **a unified view** of projects, dependencies, and team workloads.
- Ensure smooth handoffs and keep all stakeholders **automatically synchronized** without manual updates.

Comments It looks great!!
- admin Field Change • 2025-10-28 16:17:44
 

The new UI design below for your comment please.

## Reporting & Analytics

Transform real-time data into actionable insight. Track performance, project health, and trends through **customizable dashboards** that replace manual meetings.

## DevOps Integration

Connect **development pipelines** directly to project management. Link code commits, builds, and deployments to work items for full visibility and automated status updates.
